

Requirements for fires larger than 1.5m x 1.5m

In the event you have a bigger burn pile, you are required to obtain a valid Burn Reference Number from B.C Coastal Fire, Ministry of Forests, *in addition* to obtaining the Fire Department Burn Permit and coordinating the provision of additional equipment. Please remember that you are **not** allowed to burn any noxious or toxic material, which includes garbage, plastic, and hydrocarbons. Your fire should never be larger than you can safely control and must be able to be extinguished quickly if required.
